

2015 Leading EDGE Award Honoree

In their name, you see the great American patriot, Paul Revere. Many of us learned of Revere in grade school as immortalized by Henry Wadsworth Longfellow's poem, "Paul Revere's Ride." An active patriot during the Revolutionary War, Revere was also a silver-smith by trade. This trade allowed him to finance work in the casting of iron, bronze bells, cannons, along with the forging of copper bolts and spikes. In 1800 he became the first American to successfully roll copper into sheets for use as sheathing on "Old Ironsides" and other naval vessels. In 1801, Revere became a pioneer in the production of rolled copper, opening North America's first copper mill south of Boston. His company's sheet copper was used to cover the original wooden dome of the Massachusetts State House in 1802. After Revere's death, generations of Revere's descendants' remained active in the business.

The copper works founded in 1801 continues today as Revere

Copper Products, Inc. in Rome NY, which gives them the honor of being among America's oldest manufacturing companies.

Today, Revere Copper is one of the finest copper manufacturers in the world.

They have over one million square feet of manufacturing space in Rome, NY. Revere is an employee-owned company, competing in the architectural, electrical, telecommunications, air conditioning, industrial machinery, equipment, extruded profile, and other emerging markets. They proudly work as a team in a safe, environmentally sound and ethical manner to achieve absolute customer satisfaction through superior quality and reliability. They strive to continue the pioneering tradition of their founder, Paul Revere.
